Artificial Ice for Coleman Arena Being Discussed--\$1,000 Donation Promised as a Start

Offers of Financial Assistance Encourage Club Executive and Rink Company Officials to Seriously Consider Organizing Campaign to Raise Funds.

"Where there's a will there's a way" is the attitude taken by enthusiasts for winter sport who believe that by whole-hearted co-operation an artificial ice plant can be installed in the arena. It would give certainty to the public and the teams that a schedule of games would be adhered to regardless of the weather and provide facilities for the team to practice that would place them on a par with the city teams in the league. Moreover, ice would always be available for all the people who enjoy skating. If it was financed as a municipal undertaking with all people helping by voluntary contribution, free skating would be available.

The first to definitely announce a contribution is Mr. J. B. Cross, president of Calgary Brewing Co. Ltd., for \$1,000. From other sources it is stated from four to five thousand more will be contributed, while for the balance a campaign would be organized to raise sufficient from local people.

Coleman's success in the senior league has provided plenty of thrilling sport, and enlivened the winter months far more than any other sport. Without artificial ice there is always the possibility of the team having to go to Lethbridge to play games that should be played here. Financially the team would get more from such a switch, but the public want to see the games played here. For that reason artificial ice would be welcomed. More information as to cost will be secured and a plan considered by local people interested in the proposal.

LOCAL NEWS

A. W. R. Davidson is still at home suffering from a fall which seriously injured his back.

Weather conditions have been remarkably fine, with the temperature above freezing nearly every day during the past week.

So far there appears to be no interest in the municipal elections to take place the second Monday in February.

"BUNNY" MCKILLOP who scored the second Coleman goal against Lethbridge. Has now become one of Coleman's most potent scoring threats.

C. N. P. Curling Bonspiel Starts Monday at Bellevue

Bellevue will be the mecca for curlers in the Crow's Nest Pass next week, when the annual Crow's Nest Pass bonspiel will be held. Rinks from Lethbridge to Cranbrook will be in action and many keen competitions will be seen.

From Coleman at least four rinks are expected to attend. They have not yet organized, but veterans such as Ed. Ledieu, John D'Appolonia, Sam Moores and Fred Antrobus are expected to get players lined up and have Coleman represented by a large entry.

The veteran Bill Kerr, ably assisted by Rev. R. Upton, is in charge of the bonspiel and every curler is assured a real welcome.

Studebaker and Pontiac Competitions To be Held in Coleman

The annual competition for the Studebaker and Pontiac curling trophies will be held in Coleman this year, probably the first or second week in Feb.

This bonspiel is only open to rinks from Pincher, Bellevue, Blairmore and Coleman. Last year a Bellevue rink set a record when they won both competitions, the personnel of the rink being, Bill Kerr, Rev. R. Upton, Idris Haysom and Jim Wilson.

Local rinks are asked to get organized for this bonspiel.

Canadians To Leave Friday for Drumheller

A stiff schedule faces Canadians on Friday and Saturday of this week. Leaving Friday at 8:30 a.m., they travel to Drumheller to play that evening. On Saturday at Calgary they play against Turner Valley Oilers.

By defeating Drumheller so decisively here last Saturday, and from past experiences Canadians can meet the Bentleys with high hopes. With Kemp and Fraser in the line-up, which is expected, they should defeat Drumheller.

Turner Valley have won both games played against Canadians, by one-goal margins. On the large ice sheet Coleman will be able to match strides with the Oilers.

One thing that now hangs in favor of Canadians is their determination to get into a play-off berth as quickly as possible and four points on this trip is well within reach.

Following their return to Coleman on Sunday they will make preparations to meet their arch rivals, Lethbridge Maple Leafs on Monday. On Wednesday next, Turner Valley comes to town and another thrilling game is anticipated. Get your tickets early at McBurney's drug store.

"Snow White and the Seven Dwarfs" will be featured at the Palace on Friday, Saturday and Monday. Two shows nightly.

A DISTINGUISHED CANADIAN

RT. HON. RICHARD BEDFORD BENNETT, K.C.

Bringing to a close many years of patriotic service to Canada as a member of Parliament for West Calgary, and for a term as prime minister of Canada, Mr. Bennett is this week addressing a number of gatherings prior to leaving to take up residence in England. His outstanding services to the Dominion are recognized by people of all shades of political opinion, who are joining in honoring him on his farewell to Canada. Though living overseas, it is anticipated that he will continue to serve the interests of the Dominion of Canada as faithfully as when living here.

Weather Plays Havoc With League Schedules

Mild weather has played havoc this winter with Intermediate and Junior league schedules in the Pass. So far not one game has been played in Coleman of the above leagues.

Hillcrest were scheduled to appear here in an intermediate game on Jan. 4, while in the junior division both Natal and Blairmore have been scheduled

to play at the local arena, but on each occasion "Old Man Weather" has refused his permission.

NOTICE of ANNUAL MEETING

PUBLIC NOTICE is hereby given that a Meeting of the Electors of the

Town of Coleman

and

Coleman School District No. 1216

will be held in the Council Chamber on

FRIDAY, JANUARY 27th, 1939

At Eight o'clock p.m.

for the purpose of receiving the Report of the Mayor, Secretary-Treasurer, Auditor and Chairman of the various Committees of Council and School Board for the year ending thirty-first day of December, 1938.

Dated at Coleman, Alberta, this 12th day of January, 1939.

GEORGE PATTINSON, Mayor.

WILLIAM FRASER, Chairman School Trustees.

Canadians Brilliant Play Last Monday Overcame Two-Goal Lead to Tie Score With the Battling League Leaders

Coleman Team Confident of Advance To Play-off Series--Pass Towns Give Generous Support By Attendance at Games--Turner Valley "Oilers" Coming Wednesday, Jan. 18.

SID STURK who played sparkling hockey against Drumheller and Lethbridge. Scored one goal against the Miners and earned an assist against the Leafs.

"SANDY" SANDERSON who scored twice and assisted in another to lead Canadians in 6-1 victory over Drumheller.

Canadians gained new supporters over the week-end as capacity houses watched them defeat Drumheller Miners 6-1 on Saturday and come from behind on Monday evening to wipe out a two-goal deficit to hold Lethbridge Maple Leafs to a 3-3 tie in overtime.

On Saturday 1400 fans were a little disappointed in the Bentley brothers, whose fame has spread throughout the province. Whether it was because of the gruelling game played at Lethbridge the night previously or that their talents have been over estimated, the Bentleys failed to show anything that could not be improved on by Canadians.

Playing with supreme confidence and effortless ease Canadians took a 3-0 lead in the first period, increased it to 4-1 in the second and coasted home in front by a 6-1 count in the third. By their win Coleman gained fifth place in the league.

Sharpshooters for Canadians were Sanderson, two goals and an assist; Sprout, two goals; Joyce, one goal and an assist; Sturk, one goal. Assists were given by Jenkins, Redisky and McKillop on the various goals. Reg. Bentley scored Miners' lone tally on assists by Kennedy and Doug. Bentley.

In Monday's game another 1400 fans saw a thrilling game as Canadians fought from behind a two-goal deficit to tie the game and play on even terms in overtime to gain a victory of the points.

Unlike the previous game played here by Leafs, when they were on the defensive practically 70% of the game, they started an offensive immediately after the initial face-off and were buzzing around McPhail for a minute or more before Canadians relieved pressure.

Canadians were handicapped by the absence of their star goalie, Dave Kemp, and crafty centre, Bill Fraser. Kemp had a slight attack of the flu, while Fraser had a sore leg. McPhail, after a shaky start, settled down and played a sparkling game, making many spectacular saves as Leafs broke in on him. Sutherland was absent on the Leafs' line-up.

Leafs were two goals out in

front after thirteen minutes of play on goals by Ursaki and Kirkpatrick. The latter goal was scored from the Coleman blue line. Jenkins put Coleman on the score sheet at the sixteen minute mark when he beat Young to finish a grand passing play between himself, Sprout and Redisky.

Leafs went two goals up again in the second period, when French, who had just stepped on the ice after a penalty, took McIndoe's pass in centre ice and streaked away to beat McPhail with a blazing shot.

The third period saw the real fireworks begin as far as Pass fans were concerned. With the score reading 3-1, the Canadians started a power play that for sheer intensity is seldom seen at any game. Leafs were powerless to get the puck out of their own zone against the relentless checking of Canadians. Sturk managed to get the puck loose from a scrumage and sent it across to McKillop in front of goal who fired it home.

Canadians came racing back for the equalizer and Young was certainly lucky as the puck flew all around him. Milford relieved pressure momentarily when he broke away, but Canadians came back and in a power play that lasted for two minutes or more, during which time they had the puck practically to themselves, Jenkins started a play, passing to Sprout, who relayed it to Joyce, who scored. The applause was terrific as the fans roared their delight.

In the overtime neither team took many chances, being content with a draw. Ice was heavy and was reacting on the players.

It was noticeable that Canadians followed Coach Kryschuk's instructions to shoot low when playing against opposing goalies. The puck was only inches off the ice on all three goals scored by Canadians, Young having no chance to use his hands on any of the goals.

Robert Lloyd has been a hospital patient for the past two weeks.

WORLD HAPPENINGS BRIEFLY TOLD

A survey of trading in 1938 on Vancouver's stock exchange showed a decrease of more than \$22,000,000 in value of shares compared with transactions in the previous year.

Word reached Toronto of the death at Sudbury, England, of Brig-General Edmund Merritt Morris, 70, distinguished British soldier who was a native of Guelph. He retired in 1923.

The Chicago airport has installed equipment in which aviators can test their ability to withstand flying in atmospheric conditions simulating those at an altitude of 65,000 feet.

The Earl of Perth, 63, will retire in April as British ambassador to Rome and Sir Percy Loraine, 59, British ambassador to Turkey since 1933, has been approved by King George as Lord Perth's successor.

The Military Cross has been awarded to Lieut. Neil Stuart Patrick Whiteford of the Royal Canadian Air Force for gallant conduct in Palestine. He is given credit for restoring order to Jaffa in three days.

Bonusing of wheat production by the Canadian government cannot possibly continue as a permanent measure, J. T. Brown, Regina, chief justice of the Saskatchewan court of king's bench, told interviewers.

Youth must be given a more important part to play if the British empire is to continue as a moral force in world affairs, Lord Bessborough, former governor-general of Canada, told a conference of teachers at the Guildhall.

A national census of translators is urged by Kenneth R. Wilson of the Financial Post. Addressing the 18th Older Boys' Parliament of Ontario, he said a census is the first "obvious" step toward a solution of the problem.

W. R. Creighton, an Ottawa banker, has been appointed treasurer of the Canadian National committee on refugees and victims of political persecution. It was announced by the League of Nations Society in Canada, sponsors of the committee.

Plan Working Out Well

United States Has Construction Camps For Unemployed Men

During Anthony Eden's recent visit to the United States he found opportunity to make a trip of inspection to one of the C.C.C.—Civil Conservation Corps camps.

There he was, according to his own statement, the provision impressed with the plan which had been made for care of men who otherwise would have been unemployed and perhaps homeless. He noticed especially the provision for their physical well-being, the organization of social and educational groups, the order and the system under a reasonable amount of discipline.

Mr. Eden could not have seen anything like that had he come to Canada. He could have seen a goodly number of unemployed men. He could have heard how they move about the country as transients, riding on the freight trains as non-pay passengers from one place to another, and he could have seen how poorly they looked, lacking proper clothing, ill kept, often dirty and because of their experiences, in many instances, lacking hope or ambition. Canada has failed so far to care for this class of men. It has nothing comparable to the C.C.C. camps of the United States.

Visitors are beginning to take notice. More serious, the country is feeling the bad effects in a lowering of the standards of manhood.—Fort Arthur News-Chronicle.

Always A Repercussion

Nothing Happens Anywhere In World Without Affecting Other Parts

Often it has been suggested that nothing happens anywhere in the world without having its repercussions elsewhere. Thus it is interesting to note the plant of the Australian wool grower that the extension and perfection of central heating in Great Britain and the United States is reducing the demand for woolen clothing. Nowadays, people are using central heating instead of Australian wool to keep themselves warm, and Australians find it more difficult to sell their wool.

"Where's your pencil, Alf?"

"Ain't got one, teacher."

"How many times have I told you not to say that? Listen: I haven't got one, you haven't got one, we haven't got one, they haven't got one."

"Well, where are all the blinks?"

Come to think of it, Mrs. Job must have had a lot of patience, too.

UNAWARE OF IDENTITY

Although wed for 17 years, Mrs. George Dietrich, wife of George Dietrich, official of the McKesson and Robbins Drug Company, was unaware that her husband really was George Musica, brother of the self-slain Philip Musica, alias F. Donald Coster, late president of the \$37,000,000 drug company now in the news. Dietrich is held in \$100,000 bail while authorities investigate the financial structure of the drug firm. Mrs. Dietrich lives in Fairfield, Conn.

Nova Scotia Amethysts

Provide A Revenue Of \$100,000 A Year To Stone Hunters

Winter frost means more than just cold weather to one Bay of Fundy village. It may bring pocket money to amethyst hunters next spring.

When the thaw sets in they will pick the purple-hued stones from the shore of amethyst quartz outcrop at the face of cliffs around the cove.

Cyrus Steele of Scott's Bay described amethyst hunting as a "catch-as-catch-can business," but he said sales of amethysts to tourists have increased ten-fold in the last six or seven years. Some of them find their way into brooches, lockets and rings, but tourists who drive along the North Mountain like to buy the unfinished rocks in which the amethysts nestle.

The only billboards the summer tourists see as they drive through the hill country says Amethysts "For Sale." W. R. Palmer, jeweller in nearby Kentville, said the stones meant a \$100,000 a year business in Nova Scotia.

Amethysts are found sandwiched between layers of rock. Spitting the rock exposes the purple crystal. Seams run through the trap-rock formations of the mountain. Sometimes a plough turns them up. Often a farmer boring a well strikes an amethyst bed.

These beds are another source of the stones. The amethyst hunters strip off the covering clay and dynamite the rock. Hill people tell stories of fabulous beds of the purple gems in some secret place in the hills. Amethysts which are turned into jewellery have to be sent to Europe to be cut. There are few jewel cutters on this side of the Atlantic.

Like most gems, amethyst is surrounded by superstition. It gets its name from a Greek word meaning "I will protect its wearer from strong drink." The belief was held that wine drunk from a cup of amethysts would not intoxicate.

They are found in many other parts of the world. One of the chief sources is Uruguay.

Flowers From Africa

Shipment For Winnipeg Was Received In Good Condition

The National Revenue Review says S. Cusberry, superintendent, customs express branch, Winnipeg, advised the Editor that an unusual item for the Christmas trade was a shipment of cut flowers which arrived in Winnipeg from the Union of South Africa. The flowers were in good condition when unpacked, after travelling over 10,000 miles.

The name of this plant is "Chincherinchee" and is the native way of describing the sound of the stalks of the plant rubbing together. The name is now generally used for trade purposes. It is botanically known as "Ornithogalum" but the people of South Africa refer to it as "South African Wonder Flower."

These cut blooms will stay fresh from six to 13 weeks if the ends of the stems are clipped periodically, and they will continue to bloom during that time. The flowers are dainty clusters of waxy white or sturdy stems, with buds and full blooms on each stem.

If the walls of a room are built exactly straight up to any great height, they will be farther apart at the top than at the base, since a plumb bob points to the centre of the earth.

Nothing To Worry About

But Scientist Sees New York Under Water In Distant Future

A futuristic picture of a deserted New York, its streets under water and even its skyscrapers partly buried, was drawn for the Geological Society of America at its semi-centennial meeting in New York.

Such a thing might happen, said Dr. Arthur P. Coleman of the Royal Ontario Museum, Toronto, but it's nothing to worry about now.

Dr. Coleman explained that glaciers everywhere were in retreat, suggesting the world was slowly emerging from the pleistocene ice age which began about 1,000,000 years ago. Only about half the area covered by ice, he added, has so far been set free.

If and when the remaining 600,000 square miles of ice melted, he said, the level of the ocean will be raised about 150 feet.

"With a little imagination," he mused, "one can picture Oslo or Rio Janeiro, seaports with high ground in the rear to which to retreat, as sending pallid holiday cruises to see New York's deserted skyscrapers rising as steep walled rocks from a shallow sea."

"But the possibility of this taking place is so far in the future," he added, "that real estate owners need not begin to worry in our generation."

Dr. Coleman then painted another picture:—

"It is not impossible that once more ice may gather in Labrador and slowly spread over Northeastern America, finally halting at Long Island to pile up moraines or stone heaps. Then New York harbor may once more be covered with ice floes, where seals and walrus are at home and white bears prowling for their prey as they did along the Atlantic coast 25,000 or 30,000 years ago." But this, he hastened to explain, is still farther in the future than the "big flood."

Gives Them A Chance

Democracy Offers Opportunity To Ordinary People With Unusual Talents

Dr. Harry Emerson Fiedick said: "Primarily, democracy is the conviction that there are extraordinary possibilities in ordinary people and that if we throw wide the doors of opportunity so that all boys and girls can bring out the best that is in them, we will get amazing results from unlikely sources. Shakespeare was the son of a bankrupt butcher and a woman who could not write her name. Beethoven was the son of a consumptive mother, herself daughter of a cook, and a drunken father. Faraday, one of the greatest scientific experimenters of all time, was born over a stable, his father an invalid blacksmith and his mother a common drudge. Such facts as these underlie democracy. That is why, with all its discouraging blunders, we must everlastingly believe in it."

When Science Backfired

It Was Not So Good For A British Columbia Farmer

Science is a great aid to agriculture except when it backfires, says the Brandon Sun. Witness the case of the British Columbia farmer who laid electric wires between his potato rows to keep the ground warm at night. He turned on too much juice which baked the spuds in the ground. Crows attracted by the warmth settled between the rows, melted the baked potatoes, rang them up and ate them. The farmer lost his potatoes, but has a bill for 1,000 feet of wire and another for excess electricity to remember them by.

There is a boarding house where 'tis said, none but the brave can stand the fare.

NEW STEAM-ELECTRIC LOCOMOTIVE

Hailed as the first of its kind ever built, a new 5,000-horsepower steam-electric locomotive has been put through its preliminary paces at Erie, Pa., by officials of the General Electric Company, which built the locomotive for the Union Pacific. The locomotive, capable of pulling a 15-car train 125 miles per hour, is expected to "revolutionize" railroading.

CHIC AS ONLY A DIRNDL CAN BE

By Anne Adams

Here's the type of dirndl dress that every fashionable woman craves! Youth and grace in every line! Good practical comfort in every fold and so few pattern pieces to assemble, that even those who know nothing about sewing can make a grand success of Pattern 4882! Moreover, the Instructor Sheet included with this very new Anne Adams design ensures an easy time with the cutting and fitting! Don't you like the chic "how do" neck? And can't you picture yourself with those easy-to-don shirtings giving your waist the smart "doll" size look? Why not stitch up a silk frock with cute short sleeves for holiday gaities—and another, long-sleeved, in wool, for cold days?

Pattern 4882 is available in misses' and women's sizes 12, 14, 16, 18, 20, 32, 34, 36, 38 and 40. Size 16 takes 3 1/2 yards 39 inch fabric. Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number and send order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 115 McDermot Ave. E., Winnipeg.

Interesting To Watch

Order Eggs Germany's Hens Must Lay 140 Eggs Yearly

Germany is short of hens and chicken feed, and consequently of eggs, and the Reich Association of Breeders of Hens has given its official attention to the situation. Whereas the average German hen has been laying only 80 to 90 eggs a year, President Vetter, of the association, announces through the Berliner Tagblatt that "Every Hen Must Lay 140 Eggs Yearly."

We wait with great interest for further news. The American hen, in our experience, is one of the most individualistic of birds. Possibly the German hen is more amenable to regimentation, but we have our doubts whether Herr Hitler himself can persuade a hungry hen to go down to her nest and lay 140 eggs for the greater glory of the German Reich.—New York World-Telegram.

The University of Naples, Italy, was founded in 1224.

Circus lions are given milkshakes to keep their coats glossy.

SUNDAY SCHOOL LESSON

JANUARY 15

PETER SEES CHRIST'S GLORY

Golden text: We beheld his glory, given it of the only begotten from the Father. John 1:14.
Lesson: Matthew 17:1-18; II Peter 1:16-18.
Devotional reading: Revelation 1:12-18.

Explanations And Comments

Peter's Experience on the Mountain-top, Matthew 17:1-9. Six days after Jesus' resurrection, Peter, James and John, who of all the disciples enjoyed the closest intimacy with their Master, were taken by Jesus to a high mountain apart from the rest.

On the mountain Jesus was transfigured before them: his face did shine as the sun, and his garments became white as the light. Instead of thinking of a splendor falling on Jesus from without and lighting up his face and his garments, let us think of a glory coming from within, corresponding to something going on in his mind. "We were eye-witnesses in his Majesty," wrote Peter long afterwards (II. Peter 1:16-18), and he beheld his glory, the glory of the Father, the Father of glory, of grace and truth," declared John (John 1:14). "Matthew has been picturing to us the career of the King. It is as if the monarch had been walking in disguise; only occasionally beneath his humble garment has been revealed a glimpse of the purple and the gold. Here, for an hour, the disguise is withdrawn and the King appears in his real majesty and in the regal splendor of his divinity." (R. Erdman).

For Peter and the other two the scene was of lasting influence. Jesus had won their hearts. It is true, they had faith in him as the divine Son of God, but that faith was to be tested in the days to come and they needed this wonderful attestation of his divinity. Surely they could not have been so sure upon his face and the voice that spoke to them out of the cloud. It would be foolish for anyone to puzzle over the puzzle of how it all happened. When we think of what Peter and the other two did in the days following the next few years and how brave and true they were, we realize that no ordinary man could have done this. The divineness of his mission could have been theirs. Their experience on the mountain-top, however it came, was a real one and it built up in them a faith that was unconquerable.

British Workers Thrifty

Put Away On An Average About \$15,000,000 Every Week

When Premier Chamberlain hinted to Hitler that a long war was the power of British money might be a decisive factor, he was not referring to the savings of the common people. But the aggregate wealth of the common people is enormous. A survey on the savings banks, building societies and other organizations, commonly used by the working people shows that the aggregate amount "saved and put away" is a little over \$15,000,000 each week. The British working people put by an average of \$5,000,000.

Just before the Christmas season these people—who are not tightwads but like to spend on a good time—deposited \$30,000,000 of savings and interest on National Savings Certificates. That is just a "sideline" in the financial strength of Great Britain.—St. Thomas Times-Journal.

Body Stands High Pressure

Diver Undergoes Severe Test In Tank For 15 Hours

Max Eugene Nohi, Milwaukee diver, underwent the slow process of decompression in a huge steel air tank where he was confined for nearly 20 hours in an experiment that apparently indicated the human body could withstand high pressures for long periods without damage.

Engineers at the County Emergency Hospital where the test was performed began decreasing the pressure of 44 pounds per square inch, equal to that of water at a depth of 100 feet, after Nohi had been in the tank about 15 hours.

Dr. Edgar End, of Marquette University, an associate who began the experiment with Nohi, said no real distress was experienced in the confinement beyond slight difficulty in breathing due to the "heaviness" of the air.

Not Always Misquoted

Some Public Speakers Always Ready To Blame Reporters

When public men interview each other and then later on a report of the conversation is presented by way of a statement for publication there is disagreement. A great deal of it is "I never said that" has become quite a common phrase. They appear to have all been misquoted. We are quite certain newspaper reporters do much better than that. When they listen to a conversation or an address or remarks made in a public meeting they will put the result down as it took place and the charge of misquoting is not often made, and is less often justified.—Peterborough Examiner.

Health LEAGUE OF CANADA
presents
TOPICS OF VITAL INTEREST
by DR. J. W. S. McCULLOUGH

A TASK FOR THE NEW YEAR

There is one resolution which all of us can keep—a resolution to do our part for personal and community health.

Canada's health problem offers so many avenues of approach, that the greatest possible improvement would indeed be a tremendous task. So numerous, however, are the opportunities awaiting each and every one, that even a partial advance constitutes a challenge to municipal, provincial and federal authorities as well as to the individuals.

A health resolution that the private citizen might well make at this time of the year is that during 1939, he will watch his own and the health of the family and that he will caution all in his household to exercise greater care. If every individual did his part, there would be less deaths in 1939 from preventable diseases, from drownings, from motor car and other accidents.

The individual, too, could contribute to the general good of his country by identifying himself with movements calculated to protect the health of the public. He could use his influence to bring about many reforms. For example, altogether too few municipalities in Canada employ full-time medical officers of health. It is a penny-wise pound-foolish policy to "save" a few dollars in a municipal health department and risk epidemics of infectious diseases or economic loss from other preventable illnesses.

Provinces and Dominion can appropriate money for greater research for preventive equipment and for other means of cutting down the cost of illness—money that would be returned tenfold in the saving of lives. The improvement in Canada's health record during the past quarter century is something to be proud of. But it is also a proof of what can be done. It should encourage Governments to attack the problem along all fronts.

If they would join, at this time, in the making of health resolutions, it is certain that we would be moving forward towards a Canada of maximum fitness.

The task is a big one but not an impossible one. Let us resolve to undertake it as one of the important things to do in 1939!

Editorial Note: Readers desiring the complete set of Dr. McCullough's cancer articles at once may secure same by writing to: The Health League of Canada, 100 Bond St., Toronto, Ont.

March Of The Sun

Ancients Must Have Wondered When Light Failed Each Day

The march of the sun from its low point at the end of the year, to the high noon of summer, is a thrilling spectacle. It is a comforting thought that every day this center of all our life is now coming nearer.

Before science began to explain the mysteries of the universe, says the Sarnia Canadian Observer, the movements of the sun must have caused deep anxiety. The ancients must have trembled to see the sun sinking deeper every day. Would this light of all life disappear forever and leave them to perish in frozen horror? This must have been a question often asked.

How they must have celebrated in ancient times when finally the sun turned homeward again. We today know there is no danger of the sun's disappearing. But the beginning of his return is a preliminary note for the joyful symphony of spring.

Most Eminent Service

Professor Edward Thorndike, eminent Columbia psychologist, speaking: "On the whole, what great men have done by choice will probably average much higher for the common good than what they have done by pressure from employers, advisers or the public."

"My doctor's just died. Only 36 too!"

"My dear fellow, I wouldn't dream of trusting a doctor who died as young as that!"

Gossip is like yeast; a little of it goes a long way

NO FESS

RELIEVING COLD DISCOMFORT THIS WAY!

Just Follow Simple Directions Below—and Use Fast-Acting "Aspirin" Tablets

It's the Way Thousands Know to Ease Pain and Discomfort of Colds and Sore Throat Accompanying Colds—Easy to Do

The simple way pictured above often brings amazingly fast relief from discomfort and sore throat accompanying colds.

Try it. Then—see your doctor. He probably will tell you to continue with "Aspirin" because it acts so fast to relieve discomforts of a cold. And to reduce fever.

This simple way, backed by scientific authority, has largely supplanted the use of strong medicines in easing cold symptoms. Perhaps the easiest, most effective way yet discovered.

POOR MAN'S GOLD
Courtney Ryley Cooper

CHAPTER XL—Continued

Hurriedly Hammond related through thick lips what had happened in Lewis Snade's cabin. Sergeant Terry

"Hey, you!" he shouted to two miners who had been assisting Timmy at the plane. "Come get this fellow. And you—" he indicated another gold seeker, "see if you can find a cot somewhere. But if in that plane—we've got to take this man to fupert. And hurry—!"

The commands were obeyed. Whimpering, Lewis Snade was carried away. Jeanne looked after him.

"Do you think he'll live?"

"He's got to live," Hammond answered grimly. "Until we find Bruce Kenning."

"Not necessarily," said Terry crisply. "A death-bed statement is valid evidence." He reached into his red tunic for a notebook. "Better give me the whole story."

"Must it be now?" Jeanne begged. "Jack's hurt—"

The man rubbed a hand over his swollen face.

"I've got some salve up at the cabin," he said. "I'll smear it on."

"But—"

"I'll get at it."

"Better send what canoes are available around to the inlet and pick up Around the World Annie and her gang."

"I will."

"Although," Terry added, "from the way the winds taking the blaze, maybe they'll get by. But we'd better not risk it. Get 'em all on the lake, where we know they'll be safe."

"Yes, sir."

"And if Bruce Kenning shows up anywhere, take charge of him. That's all—I'll be back as soon as I can make it."

Hammond raised a hand in half salute. Timmy Moon slowly turned his plane, taxied a short distance, headed the ship into the wind and took off, a great, carbide bird in the glow of the flames.

Hammond went on, hurrying for Jeanne's store, to find her there, loading what food her shavings possessed into the arms of waiting miners. He delivered Terry's orders.

Then:

"Hammond's hard to kill," cut in Sergeant Terry. "He'll be all right." Jeanne Towers shook her head as though she did not believe him. Hammond forced a laugh.

"I'm all right, Jeanne. I'd take twice this to do what I did to Kenning. Stop worrying about me."

Then, as tersely as possible, he obeyed Terry's command for the entire story of his fight. There was no time to be wasted in long descriptions or wordy theories. The fire was coming closer; from behind them the twisted streets of the little town were loud with howling huckies, the cries of women and the commands of men; the exodus toward the life rafts already was beginning. There would not be room on them for everyone—many must take their chances in the shallows of the lake, lying there with their nostrils barely above water. The rafts, in fact, were only for women and weaker men.

Sergeant Terry finished taking his notes and slipped shut his memorandum book.

"I've already sent out the other planes to Fourcross and Vanderhoof to get help," he said crisply. "I had intended to shoot Timmy Moon into Ruperia, but I'd better go with him and take that man's statement on the way." He started to follow Timmy was in the cockpit, with the motor idling. Two men stood on the pontoons, shoving a cot through the cabin door, while two others waited on shore with the whining Snade in their arms.

Jeanne went to the injured man and laid a hand on his shoulder.

"Don't be sore at me," he begged. "I never planned it; honest to God, I didn't."

"I'm not sore at you," the girl said slowly. "I—guess you couldn't help yourself. You've never been able to help yourself, Lew."

Her hand lingered for a moment, then was withdrawn. Pale with emotion, Jeanne made one more plea to Jack to care for his hurts. Then she turned and went slowly back toward town and her store; the groceries on its shelves might be badly needed in the days to come. Sergeant Terry looked after her.

"She must have thought a lot of that fellow at some time or another," the mounted policeman said.

"She must have," Hammond answered, in a queer voice. "To be able to have forgiven him like that."

"There had been something humbly sublime about it. Jack found himself wondering what Kay would have done under such circumstances, the vilification she would have heaped on this man, the questions as to how would become of her. All in a night, Jack Hammond had gained perspective. It was as though his subconscious brain had been gathering evidence for months, that it might await the proper moment to lay a convincing case before his conscious mentality. Now it had been done, and all that was left was the hurt of it and his shame for himself. Suddenly, however, he put his thoughts aside.

Lew Snade was carried aboard. A canoe awaited the Sergeant to ferry him the short distance to the airplane. He was snapping final instructions.

"I'm going to leave you in charge," he said. "Hear that, you men? Hammond here in the command of fighting until I get back. And Jeanne Towers better be responsible for the women."

"Yes, sir."

"Carry the news into town. See that everybody knows it."

"They hurried to obey. The Sergeant went on:

"You'd better start a back fire as soon as possible."

"Yes, in that marsh grass to the west. That's the danger point—embers will be dropping over there pretty soon. If that grass goes, the town goes."

"The town's going, anyway but we might as well take the long chance to save it."

"I'll get at it."

"Better send what canoes are available around to the inlet and pick up Around the World Annie and her gang."

"I will."

"Although," Terry added, "from the way the winds taking the blaze, maybe they'll get by. But we'd better not risk it. Get 'em all on the lake, where we know they'll be safe."

"Yes, sir."

"And if Bruce Kenning shows up anywhere, take charge of him. That's all—I'll be back as soon as I can make it."

Hammond raised a hand in half salute. Timmy Moon slowly turned his plane, taxied a short distance, headed the ship into the wind and took off, a great, carbide bird in the glow of the flames.

Hammond went on, hurrying for Jeanne's store, to find her there, loading what food her shavings possessed into the arms of waiting miners. He delivered Terry's orders.

Then:

"Hammond's hard to kill," cut in Sergeant Terry. "He'll be all right." Jeanne Towers shook her head as though she did not believe him. Hammond forced a laugh.

"I'm all right, Jeanne. I'd take twice this to do what I did to Kenning. Stop worrying about me."

Then, as tersely as possible, he obeyed Terry's command for the entire story of his fight. There was no time to be wasted in long descriptions or wordy theories. The fire was coming closer; from behind them the twisted streets of the little town were loud with howling huckies, the cries of women and the commands of men; the exodus toward the life rafts already was beginning. There would not be room on them for everyone—many must take their chances in the shallows of the lake, lying there with their nostrils barely above water. The rafts, in fact, were only for women and weaker men.

Sergeant Terry finished taking his notes and slipped shut his memorandum book.

"I've already sent out the other planes to Fourcross and Vanderhoof to get help," he said crisply. "I had intended to shoot Timmy Moon into Ruperia, but I'd better go with him and take that man's statement on the way." He started to follow Timmy was in the cockpit, with the motor idling. Two men stood on the pontoons, shoving a cot through the cabin door, while two others waited on shore with the whining Snade in their arms.

Jeanne went to the injured man and laid a hand on his shoulder.

"Don't be sore at me," he begged. "I never planned it; honest to God, I didn't."

"I'm not sore at you," the girl said slowly. "I—guess you couldn't help yourself. You've never been able to help yourself, Lew."

"Don't get excited and leave your money to burn up in the store." She managed to smile.

"Oh, I've got it." Then again she looked concernedly at his bruised features and matted hair, indicating a cut on the right side of his head.

"Please," she begged. "Tie some white cloth here I could use for bandages."

"Thanks. That save I've got over in the cabin is best. Bandages are bad stuff when there's a fire around."

"But you will take care of yourself?"

He promised and whistled, calling to a miner to start a rescue squad with canoes to Whoopee.

Then he said to Jeanne: "Tell the women they'll probably have to mix with the girls from Around the World Annie when they get on the rafts."

Jeanne handed a sack of dried potatoes to a waiting miner.

"Yes, I'll tell them. They've got enough sense to understand."

"And send someone for Kay Joyce—to be sure she gets out of her cottage."

The girl looked up.

"I've already done it," she answered. Hammond turned away. It was like Jeanne Towers, to think first of the woman who had reviled her. Just as she had been able, with a pat of her hand, to forgive every blow which Lew Snade had dealt her.

A score of miners awaited him as he came down the narrow street from his cabin after a hasty dressing of his wounds.

"Ready for orders," said one of them.

Hammond replied quickly. "We've got to hit for Loom creek. And start back-firing."

He led the way out of town and up the stream, dropping a man at intervals of three or four hundred feet, at last to present a line nearly a mile long, waiting for the signal.

Hammond gave it, with a shout that was picked up by the nearest man, sent onward, to be echoed and re-echoed. Makeshift torches blazed, faintly yellow in the brighter glare. Flames leaped to life. Then, with a suddenly strengthening crackle, the marsh grass began to burn, while the workers under Hammond followed it slowly, to re-ignite it at spots, and to be ready, once they reached the forest, to apply even more fire for any reason, the sweep of this onslaught did not take root there. It was the only chance the town had for salvation—to send a fire against the wind and into the forest, that flame might meet flame and thus restrict its area of destruction.

Even Their Dreams Are Less Fantastic Than Women's

Dreams of men and women are different. There is more beauty and more of the fantastic in women's dreams and more of the practical side in men's dreams. Dr. Charles Diersen of the University of Cincinnati reported to the American Association for the Advancement of Science.

Women, he said, dream of hearing music more often, see colors more often, and have more nightmares. Men have less anxious dreams, more that are embarrassing, and more that they are thirsty. Both sexes tend to dream in the latter part of the night.

Returned To Old Stands

Detroit Men Sold Newspapers On Streets For Cheer Fund

Detroit's Old Newsboys who are judges, lawyers, doctors and men high in civic life, returned to the streets and sold papers again. Their receipts were more than \$150,000 for the group's annual cheer fund.

Many men sold newspapers on the corners where, as youngsters, they had earned their living. The funds brightened the holiday for 65,000 underprivileged children. The Old Newsboys, all actually recruited from the ranks of former newsboys, started 25 years ago with a Christmas cheer fund objective of \$400.

How Bacteria Multiply

Most bacteria reproduce by the simple method of splitting apart. One individual becomes two, two become four, and so on. This can happen every half hour, under favorable conditions. At this rate, one bacterium in 24 hours could give rise to 281,500,000,000,000 descendants.

Are you Weak? Thin?

WOMEN who are weak, thin, nervous, have no appetite, need Dr. Pierce's Favorite Prescription. This tonic stimulates the appetite, improves nutrition, calms the nerves, tones the male organs.

Dr. C. Parkins, 292 Queen St., St. Paul, Minn., says: "I am very little, always was 'thin' and was so weak and nervous I was just about sick and lame. Dr. Pierce's Favorite Prescription helped to build me up, and in doing so, my nerves and made me feel better in every way. My appetite increased, I ate heartily, gained weight, my normal strength returned, and I felt like a new woman." But it is liquid or solid at your drug store today.

Small Reward For Honesty

Leo Wade found a woman's purse on the street in Lynn, Mass., opened it and discovered \$2,613 in cash and bank books for deposits of \$3,200. An automobile license listed the owner's name, so Leo returned it to her hotel. His reward was \$5. Signa Wade: "I'd do the same thing again."

"Carrying trade" is a term used in political economy and in commercial transactions to designate the commerce of different nations with each other.

Scottish farmers report their worst crop season in 25 years.

H. T. Halliwell, Proprietor.

NOTES AND COMMENTS

NOBODY appears to care if Rocky Mountain constituency is wiped out as far as provincial politics are concerned. Even if they did, little consideration would be shown judging from the attitude of the government to all who do not agree with their policies.

PINCHER CREEK old-timers raise an objection, and do not want the name eliminated from provincial constituencies. Rocky Mountain, of which Coleman and all Pass towns, including Burmis, form a part, and a narrow strip of territory along the eastern slope of the Rockies, also the towns from Seebe to Lake Louise on the main line of the Canadian Pacific, is a constituency of which it might be said that the north part knew nothing much of what the south was doing.

Outside of the Pass, the latest voting centre in the present constituency set-up is Banff, and heretofore it has not taken an active part in provincial politics, because it is under national parks administration of the Federal government.

HOWEVER, the majority of voters in the constituency are mine workers of the Pass towns and Canmore. Their problems are distinctly apart from those of the agricultural section. Just how it is proposed to line up this industrial vote with the agricultural is problematical. The Journal has always contended that the miners need a member in the Legislature truly representative of their class, being the majority.

IT CANNOT be the faintest stretch of the imagination be conceded that the present member has been more than a "yes-man" for Mr. Aberhart. Doubtless his influence has been useful in getting a few jobs for party workers, working on the damned political system in this country that "to the victor belong the spoils," with the resultant deterioration of the civil service generally.

A PART from re-distribution of constituencies, in a province which has far too many members in its legislature and which are costing the taxpayers far more than in its 33 years of existence, there is need of the utmost vigilance to preserve democratic institutions. Here is Aberhart telling the people he wants 56 members in the next legislature, or he will quit. The sooner the better, we would say, for a man of his type, whose repudiation of contractual debts is what in individuals would be termed rank outlawry and the casting aside of honest principles.

WE ASK the people of this constituency, what benefits have they received? On the other hand they are paying increased taxes, and the government is bragging of not borrowing money while it has refused to meet its obligations. What would we think of one man borrowing a sum of money from his neighbor, refusing to pay him, and then go bragging of how he was prospering? A fine example for a government to encourage respect for governmental institutions. For that reason alone, aside from Mr. Aberhart's betrayal of the people in the promises he made in 1935, he never has had and never will have the respect of men who prize honor and virtue above personal gain.

Social Crediters Here Next Week

Members of the Social Credit Board, according to Albert E. Knowles, will visit Coleman on Wednesday and Thursday next to impart some light on the work of the \$100,000 S. C. Board and the establishment of S. C. "banks." A meeting of business men will be held on Wednesday afternoon, and a public meeting on Thursday. Mr. Baker, G. McLachlan and E. O. Duke, M.L.A., are expected.

COUNTER CHECK BOOKS of best quality at factory prices, including taxes and freight charges, laid down cost to customer. Journal office.

Famous Speaker Initiates New "Mike"

CAPTAIN ANTHONY EDEN, former British Foreign Secretary, speaking before members of the National Association of Manufacturers during the organization's annual dinner at the Waldorf-Astoria in New York. His address marked the first public use of Northern Electric's new versatile "cardioid" microphone, recently developed by the Bell Telephone Laboratories. This instrument owing to its unusual characteristics, enables radio engineers to select sounds from any direction and to suppress the effects of unwanted noise.

Serious Charge in Local Police Court

F. O. McKenna, K.C., of Pincher Creek, Liberal nominee for the next Federal election, was here today. He was acting for the defence in the case of a young man, resident here, charged with being in possession of allegedly stolen goods. The charge arose from a burglary at a local store a few weeks ago, when several hundred dollars worth of clothing and other goods were reported stolen. R. F. Barnes acted for the prosecution and Magistrate J. W. Gresham presided.

Masonic Lodge Installation

With Arthur E. Graham, worshipful master of Summit Lodge, A.F. & A.M., as installing master, assisted by past masters Rt. Wor. A. F. Short, J.O.C. McDonald, W. L. Borrows, G. Pattinson and W.L. Rippon, the following were installed at a special meeting on Thursday last in the Masonic hall:

S.C. Short, W.M.; R.F. Barnes, S.W.; A. F. Short, J.W.; J. Emmerson, treasurer; Norman Anderson, chaplain; J. A. Park, S.D.; Norman MacAulay, J.D.; A. B. Westworth, S.S.; Paul S. Grundy, J.S.; W. S. Purvis, director of ceremonies; H. T. Halliwell, organist; W. Wilton-Clark, tyler.

G. E. Cruickshank, past grand master of the Grand Lodge of Alberta, and H. O. Westrup, district deputy grand master, and several members from Hillcrest and Blairmore attended. Following the installation a social half hour was spent and refreshments served.

Nominations for Council and School Board

Three Councillors and Three Trustees to be Nominated—Mayor Pattinson Has Another Year.

Councillors W. Chapman, W. L. Borrow and J. Plante's two-year-terms on the town council expire this month, and Trustees Fraser, Fleming and Sharp, of the school board. Remaining on the council besides the mayor are J. Atkinson, W. White and F. Antrobus; on the school board Harold Chamberlain and R. M. Greenhalgh.

Up to the present no intimation has been received as to nominations, which take place the first Monday in February, following the annual meetings of ratepayers of the town and school district on Friday, Jan. 27, notice of which is published in this issue.

The election will be held on Monday, Feb. 14, with E. D. Batrum, municipal auditor, as returning officer. The only one who has expressed his willingness to serve again on the council, at time of going to press, is J. Plante, who has been active on the works and property committee.

Following the annual meeting, it is anticipated there will be more interest shown in nominations, which will be received between 11 and 12 noon on Monday, February 7, at the council chamber.

Economical administration by past year's council has resulted in ratepayers receiving good value for money expended in improvements on roads and sidewalks.

No penalty will be added to arrears of town taxes as at Dec. 31, 1938.

Accounts passed for payment amounted to \$297.75.

Until the financial statements of the council and the school board are available to the ratepayers, details of expenditures cannot be reviewed, but these will give complete information on how the taxes have been spent.

Fined \$1.00 and Costs

For using objectionable language at the hockey match on Monday, a Hillcrest man was charged before Magistrate Gresham at Blairmore and fined \$1 and costs. When requested to move aside from one of the seats between the seats in the arena, he became objectionable, with the result that the police laid a charge against him. It was his first offence.

IT'S IN YOUR FACE

You don't have to tell how you live each day;
You don't have to say if you work or you play;
A tried, true barometer serves in the place.
However you live—it will show in your face.
The false, the deceit that you bear in your heart,
Will not stay inside where it first got a start,
For sinew and blood are a thin veil of lace:
What you wear in your heart, you wear in your face.
If your life is unselfish, if for others you live;
For it's not what you get, but how much you can give;
If you live close to God in His infinite grace,
You don't have to tell it—it shows in your face.

Flirting With Death

The study of a report issued in December by the Board of Transport Commissioners for the "Dangerous Practices of Motorists, Drivers of other Vehicles and Pedestrians at Protected Crossings" leaves the student not only unsurprised at the statement that "motor accidents are becoming more frequent" but astounded that there are not more deaths at railway crossings than the information and statistics record.

The report covers in detail a number of dangerous practices observed at some of the more important protected railway crossings across the continent from Halifax to Vancouver during, roughly, a six-month period of 1938.

The crossings referred to in the report are those protected by various devices to prevent motorists running into danger when trains are approaching. Some of them are equipped with wig wags, warning lights and bells, some are manned by flagmen and others equipped with gates, automatic and otherwise.

The data contained in these tabulated reports gives date, hour and location and the number of the license of the automobile or truck involved in some dangerous practice observed, presumably by some official who was stationed in the vicinity at the time of the reported occurrence.

Since at each of the crossings specified in the report, only two or three dates are listed in each month and usually about the same hour of the day it is obvious that the specific cases cited are merely an infinitesimal fraction of the number of violations of commonsense and traffic regulations that actually occur, not only at any one and every one of these protected crossings, but that hundreds, may thousands of chances are being taken daily at innumerable unprotected crossings throughout the country.

Dangerous Dodging

That the game of trying to beat the train to the crossing is being indulged in daily all over the country by hundreds, if not thousands, of drivers is quite evident from a careful perusal and analysis of a summary of the report, since this leads numerically all other "offences" at protected crossings.

Out of a list of 24 forms of dangerous practices observed at protected railway crossings across the Dominion, with a total of 346 cases cited, no less than 140, or 40.7 of the total are listed under the caption "Crossed in front of approaching train", despite the fact that some form of warning signal was in operation at the time.

How desperately anxious many motorists are to get across the tracks ahead of the oncoming train is illustrated in the statement that of the 346 cases recorded a total of 42, or 12.1 per cent. of the total drove under the gates while they were lowered, and even the fact that gates were actually down to bar the way, did not deter 31 drivers or 8.9 per cent. of the total continuing their headlong course and crashing through and damaging the gates.

When such reckless conduct is displayed on the highways by a large number of drivers it is no wonder that accidents are increasing and what is even worse is the fact that deaths and injuries are increasing despite a vigorous educational campaign being conducted by radio and through the press against carelessness and in face of a continuous increase in the number of safeguards that are being installed by governments, automobile associations and other organizations interested in efforts to make the highways safer.

Of Doubtful Value

"Regardless of stop signal, sign or front of engine. Very close." With variations in wording the foregoing citation appears under the heading "Dangerous Practices" and fills up two pages of the report covering incidents observed at railway tracks at one crossing alone in Saskatchewan, and this is only the crossings fully equipped with all the usual automatic signalling devices.

Even a hasty glance at the report leaves one wondering whether such safety devices are of any value at all, in view of the persistency with which they are ignored to the danger, not only of the driver of the car or truck concerned, but too often to the peril of passengers as well.

The appearance of railway tracks at exercise caution in the minds of or not, should instantly inspire an urge to exercise caution in the minds of all drivers, knowing as they must do, the inexorableness of a heavy railway train being hauled by a steam or electrically driven locomotive. Instead of that, however, it serves to promote in many a desire to experience the thrill of flirting with death by trying to "beat the train to the crossing" and apparently the closer the shave the better.

It is difficult to know what to do to curb the insanity of such drivers, except perhaps to check up on them at some of these crossings and in every case of such wild bravado to suspend their licenses for a first offence and to cancel them entirely the second time they are caught.

Reductions Forecast

League Of Nations May Dismiss

Some Of Its Staff Members

Drastic reductions in appropriations and dismissal of staff members in League of Nations offices were forecast in the budget committee's report.

The committee recommended that the 1939 budget, now set at \$7,252,600, be reduced by \$1,518,750.

As reasons for the proposed economies were cited withdrawal of some states and the end of surpluses accrued from back payments by members.

Gloacester, England, is to have a new \$5,000,000 airplane factory.

EARN 50¢ to \$2.00 OR MORE EVERY WEEK

New Germ Destroyer

Doctors Find Bacteria Can Be Killed

A new method of electrocuting disease germs with light waves was announced before the American Association for the Advancement of Science.

Dr. Harvey C. Rentschler and Dr. Rudolph Nagy of the Westinghouse research laboratories, Philadelphia, reported they had found one of the weak spots in the lives of bacteria. Apparently, they declared, each different type of germ can be killed by a different type of light. The intensity of light for a definite period of time. Practical value of their discovery will probably be in the hospital operating room where a special light will be focused on the incision to kill any germs which may be present to cause infection during or after the operation.

It may soon become possible for the surgeon to push a button which will sear and create rays to destroy gas gangrene germs, tetanus bacteria, fever-causing organisms, or the types which cause bone diseases.

Brought Cost Down

Before the Canadian field of radium discovered, most of the world's supply came from the Belgian Congo, and sold for \$70,000 a gram, or more than twice the present price of \$84,000 an ounce.

The tomato is the vegetable canned in the largest volume in the United States, with peaches and pineapples leading the canned fruits.

A Youth City

Plan Gathering Place For Empire

Youth In The Heart Of London

A dream dating back to the coronation—the foundation of a £1,000,000 empire youth city in the heart of London—has moved a stride nearer realization.

Before a gathering of United Kingdom headmasters at the Guildhall, and later to representatives of the Empire press, the Earl of Bessborough, former governor-general of Canada and prime leader in the movement, produced for the first time in public architectural drawings for the project and outlined details of what he described as a "glorious ideal."

The idea of a youth city, Lord Bessborough said, emerged from the empire youth rally at the time of the coronation, and the entire project had been designed for youth by young people.

Much ground work already has been completed but such a vital undertaking could not be launched until public opinion throughout the empire has been canvassed.

He was confident enthusiastic support would be forthcoming from empire-minded men, public spirited organizations and school children themselves.

The cost, which is almost \$5,000,000, might sound like an extravagant expenditure, "but let us not forget that only a few months ago we emerged from a great crisis," Lord Bessborough said.

"To realize our dreams would at the most compare with the cost of a destroyer. A destroyer is built for defence, and so will the youth city be. Now is the time, therefore, to start building it before a new challenge comes to us."

The former governor-general cited the following cardinal objects of the plan:

1. To provide accommodation for visiting students of secondary school age from the United Kingdom, the dominions, colonies and foreign countries.

2. To supply facilities for education, entertainment and recreation, a home away from home for the young people of the empire.

3. To symbolize the spirit of unity and co-operation among the family of free peoples.

4. To express the empire's confidence in the qualities of the younger generation for the future.

5. To stand as a perpetual challenge to disinterested service. The proposed youth city would embrace a large central block containing approximately £250,000 which would be met by a grant from public funds.

In this building it is planned to lay out a theatre seating 1,200, a restaurant, gymnasium, swimming pool, a chapel, library, lecture halls, museums, offices and board rooms.

Radiating from the centre would be smaller dormitory wings representing each of the dominions, India and the colonies, each designed to accommodate 200 students.

Aviators Had To Run

Were Chased By Bull After They

Made Forced Landing

No sooner had the crew of a Royal Air Force bomber forced down in a field near Loughborough, England, escaped one peril by landing without mishap, then they had to run at top speed from another. A bull, enraged at their intrusion, went for them the moment they stepped from the airplane. They found safety just in time on the other side of a hedge. Thus thwarted, the bull turned and charged the plane, but though madder it when he came up to the machine.

Has Nickel-Steel Propeller

Boat On St. Lawrence River Is

Largest Ice-Breaker In World

The world's largest ice-breaking boat is one which keeps the upper St. Lawrence River navigable throughout the winter months. The ship's huge propeller is composed of four detachable nickel steel blades, each weighing 3,500 pounds. Nickel steel is required since the propeller must be sufficiently strong to resist the shocks of heavy impacts at low temperatures, reports a White Metal News letter.

Coral, which looks like a plant, but which really belongs to the family of animals known as polyps was believed to be an insect for centuries.

Tunis, capital of Tunisia in North Africa, has a population of 250,000.

STOPPED IN A MINUTE...
Are you tormented with itching (eczema, rashes, athlete's foot, ringworm, or other skin ailments)? For quick relief, use Clear, cooling, antipruritic, liquid D. D. D. Prescriptions. Its gentle action soothes the itchy skin. Clear, granules and ointment—no harm. A 3¢ trial bottle, at drug stores, means a money back.

TAKE THE
LEAD OUT
OF YOUR LEGS

Get Oxygen in Your Blood and You'll Get the Lead Out of Your Legs. People who suffer from lead poisoning have been completely cut off from their blood supply. They are unable to carry the oxygen you breathe in to every part of your body. Your kidneys, liver, stomach and bowels slow down. Your skin gets pale, flabby, often pimply. Your nerves may become jittery—just like getting lead depressed.

What you need is Dr. Williams' Pink Pills. These world-famous pills help make more and better red corpuscles and thus increase the oxygen-carrying power of your blood. Get Dr. Williams' Pink Pills today at your drugstore. See for yourself how quickly this time-tested blood-builder will help give you back your pep. Give 100¢ to 150¢ to Williams Co. Ltd.

Southern Polar Air Route

Would Save 10 Days In Africa

Australia Flight

A "southern polar air route" which would cut an estimated 10,000 miles from the air journey between South Africa and Australia is under consideration, the Government disclosed in a white paper—an official report.

To fly from Cape Town to Sydney now one must travel the length of Africa northward to Alexandria, then follow the "Empire route" via India and Singapore.

It is proposed to obtain permission from France to use the little-known Adelle Land, 1,400 miles from the South Pole for a stop-off point.

From Adelle the route would follow the southern polar circle route to Adelle Land, then swing northeast to Australia, saving an estimated ten days in flying time.

In return for French co-operation, the Government of the United Kingdom, Australia and New Zealand would give French aviation the right to use their south polar territories.

Just Another Mystery

Red That Bounces Is Reported From

Tahiti In Virginia

Folks in Jonestown, Virginia, looked for some natural explanation to the riddle of nine-year-old Bertha Marie Sybert's "bouncing bed," a phenomenon her aged grandmother attributed to witchery.

People of substance thereabouts with good natural explanation returned and returned to a scratching and bumping and violent quivering of the child's old wooden bed.

Mrs. Rebecca Sybert, the grandmother, said she started last month with a gentle scratching on the bed shortly after Bertha retired at her usual 6 p.m. bed-time. As nights passed, the scratching increased to a pumping and thumping and then the bed began to quiver and quake.

The "Victor Howard, a Baptist minister, said he saw all that Mrs. Sybert described and added:

"Such things are 'just beyond my knowledge.' Bertha says she isn't frightened, but it's 'very uncomfortable.'"

SELECTED RECIPES

HAM WAFFLES

2 cups sifted flour
2 teaspoons double-acting baking powder
1 teaspoon salt
3 egg yolks, well beaten
1 cup milk
5 tablespoons melted butter or other shortening
3 cups white, stiffly beaten
1 cup finely cut, boiled ham
Sift flour once, measure, add baking powder and salt, and sift again. Combine egg yolks and milk; add gradually to flour, beating only until smooth. Add shortening. Fold in hot water. Sprinkle with waffle with 1/4 cup ham just before closing waffle iron. Serve with butter and maple-flavored syrup, or with scrambled eggs. Makes four or five four-section waffles.

SOUR MILK WAFFLES

2 cups sifted cake flour
1 1/2 teaspoons double-acting baking powder
1/4 teaspoon soda
1/2 cup sugar
2 egg yolks, well beaten
1 cup sour milk or buttermilk
4 tablespoons melted butter or other shortening
2 egg whites, stiffly beaten
Sift flour once, measure, add baking powder, soda, salt, and sugar, and sift again. Combine egg yolks and milk; add gradually to flour mixture, beating only until smooth. Add shortening. Fold in egg whites. Bake in hot waffle iron. Serve with butter and syrup. Makes four or five 4-section waffles.

Not So Gullible Now

Not many hundreds of years ago, people were willing to believe in almost any kind of creature that they were cared to invent. There were mermaids, satyrs, unicorns, lamias, alps, centaurs and sea serpents of various sizes and descriptions.

Bones of a giant horse and dwarf buffalo were discovered in South Africa caves by scientists seeking further trace of man's purported ape-like features.

Great Aid To Trappers

Airlanes And Wireless Have Made

Their Work Easier

Canada's oldest business—trapping—has been "streamlined" through use of the aeroplane and wireless. The swift drama of modern methods has replaced the picturesque of the canoe and portage.

The majority of the estimated 300 to 400 trappers operating in the Northern Territories and remote Northern regions of British Columbia, Alberta and Saskatchewan now take full advantage of commercial aviation and widespread radio facilities of the Royal Canadian Corps of Signals.

Each fall Edmonton commercial aviation firms carry north nearly 150 trappers, their dogs, canoes, traps and provisions. Throughout the winter aeroplanes call at the trappers' cabins or the nearest post and freight the furs to market. In the spring the modern Courier de Bois are whisked from the loneliness of their trap lines to civilization in a few hours.

Besides eliminating many weeks on the trail to and from the trapping ground, the aeroplane enables trappers to locate new ground quickly after old lines have been "trapped out."

The plane also makes possible exploration of good territory formerly too remote for economical fur-chasing, avoids the danger of losing furs in hazardous trips on swift-running rivers in the spring and allows marketing of furs in prime condition, when they bring the highest prices.

Right Man In Right Place

Commander Of Mediterranean Fleet

Noted For Great Courage

Admiral Sir Dudley Pound, whose command of the Mediterranean Fleet is to be extended for another year, is the right man in the right place.

Bluff and breezy in manner, states the News of the World, he has at the same time a high reputation for seaworthiness, and is the author of a standard book on ship organization. A convinced believer in the big ship, he has never concealed his view, in recent years, that Britain must be prepared for any emergency in the Mediterranean.

He is a man of great personal courage. On one occasion he saved the life of a drowning stoker in British Columbia. On another, when he was in command of the battleship Superb, he ordered himself to be lowered, with a warrant officer and a petty officer, into a hold in which three men had been overcome by foul air.

The petty officer was hauled up unconscious; but Comdr. Pound was then was—after the warrant officer succeeded in wading up the three victims before they themselves were drawn out more dead than alive.

Must Play Anthem Slower

A piece of music criticism from Chancellor Hitler resulted in an order from Heinrich Himmler, chief of all German police, that the German national anthem, Deutschland Ueber Alles, shall henceforth be played "at a speed in conformity with its nature." The furore complained at a recent Nazi meeting the anthem was played too fast.

Was Giant Reptile

The clamosaurus, giant reptile of the prehistoric period, had a body similar to a porpoise, and an astonishing snake-like neck. It had a length of 40 feet, and inhabited the area now known as Kansas, which, at that time, was a vast sea, as deposits now indicate.

"Mother, have you got a penny for a poor old man?"

"Where's the poor man, my son?"

"Down at the corner selling ice cream waffles."

Try
ICE CREAM
made by Jack Frost

Let Jack Frost and your own window-sill take care of your dessert-worries. Just mix a package of Jell-O Ice Cream Powder (cost about 12¢) with one quart of half milk, half cream. Put the bowl outside on your window-sill in freezing weather—stir a few times and Jack Frost'll do the rest! And the result—the smoothest, richest ice cream you ever tasted! Comes in 5 tempting flavours—chocolate, strawberry, vanilla, maple, lemon. For three pints of delicious, economical, easy-to-make ice cream ask your grocer for it today!

JELL-O
ICE CREAM
POWDER

Memorials Of Coronation

Will Recall Event For Many Years

Throughout British Empire

The coronation of King George and Queen Elizabeth in the spring of 1937 will be recalled for a long time to come by 10,000 things of beauty and utilitarian value around the British empire, and even in some countries that are not of the British empire.

The Coronation Planting Committee, with headquarters in London, tells of results achieved under its leadership. The objective of the committee was to encourage and advise upon endeavours that would lead to permanent, living memorials of the coronation in all parts of the British world. The planting of trees, provision of open spaces, recreation grounds, public gardens, permanent window-box displays and other decorative schemes of recreational enterprises were noteworthy forms of commemoration to which the committee gave attention.

Information on all these undertakings, together with photographs in many cases, is being whittled into a volume to be known as "The Royal Record." The original volume will be presented to the King, and copies will be made available to the public.

The entire undertaking—the project by the thousands that have gone to mark the coronation and the preparation of the volume telling of them all by word and picture—reflects imagination. It is another of those things that illustrates the practical interest with which a throne may be regarded by the subjects served by it. Regina Leader-Post.

The tuna, a fish that sometimes weighs more than 1,000 pounds, is sold mostly in half-pound cans.

Residence Legislation In Each Province In Respect To Labor

Ottawa.—Canadian labor in primary industries must be free to follow work wherever it may be found, A. S. Hardy of Ottawa, chairman of the national committee on non-residents and migrants of the Canadian Welfare Council, said in a statement Sunday.

Urging the need of readjustment of provincial residence legislation, particularly as it affects relief payments, Mr. Hardy said the workers "should not be subject to loss of established legal residence and at the same time prevented from acquiring a new one within a reasonable period of self-supporting labor in another area."

Desirability of comparable legislation being enacted in each province will be discussed when the committee convenes here Jan. 24 and 25, the chairman said. Participation of 12 national agencies closely associated with the question and representatives of voluntary and public services from large centers was assured.

"Fundamentally the question is a legal one," said Mr. Hardy. "It turns upon the working out of comparable residence legislation in each province and reciprocal arrangements among the different provinces and municipalities."

Proposals to be submitted to the committee as a basis for their recommendations were:

1. Creation of central registry bureaux at all probable centers of heavy concentration of non-resident or migrant persons.
2. Issuance of a special registration card or voucher which will enable the bearer at all times to prove his place of established legal residence.
3. Withdrawal, to more or less permanent care, of all persons obviously incapable of re-establishment on a self-supporting basis.
4. Creation of a military service corps for the special training of able-bodied, employable men, 18 to 30 years of age, voluntary enrolling for a definite period of time for the courses offered through such a service.

President Roosevelt's Speech Is Acclaimed By The British People

London.—Prime Minister Chamberlain acclaimed the sentiments expressed by President Roosevelt before the United States congress as fresh evidence of the vital role of the American democracy in world affairs and its devotion to the ideal of ordered human progress.

David Lloyd George and other political leaders agreed with him in welcoming the address. Mr. Chamberlain interrupted a conference with Foreign Secretary Halifax to issue the following statement:

"Nobody who is charged with the heavy responsibilities of government could fail to be impressed by the solemn words with which the president of the United States greeted the elected representatives of the American people."

"In these islands, where there is no clear a realization that only through freedom and peace can we hope to maintain and develop for ourselves and those that follow after us the benefits for which we have labored for generations, the sentiments expressed by the president will be welcomed as yet another indication of the vital role of the American democracy in world affairs and its devotion to the ideal of ordered human progress."

Mr. Lloyd George said of Mr. Roosevelt's address: "It was a grand speech. I listened to every word of it with growing satisfaction and delight. If it is followed by action not only in home but in foreign affairs it will be the opening of a new era for human freedom."

Clement Attlee, leader of the opposition in the House of Commons, said: "I welcome the president's message as showing a realization that the Fascist menace to civilization and democracy concerns America as well as Europe and that liberty must be fortified by economic reconstruction to solve the problem of poverty in the midst of plenty."

Alfred Duff Cooper, former first lord of the admiralty, said: "It was a fine, epoch-making speech which put fresh heart into free people all over the world."

5. Initiation of such other special training, works settlement, and occupational projects as may be justified by the classifications revealed through the detailed registrations of the central bureau.

6. Every effort, within the local community, and on the part of the private employer, to develop occupational opportunities for workers enrolling in the special training or work projects.

For Royal Visit

Officers of R.C.M.P. To Be Assigned For Special Duties

Ottawa.—Royal Canadian Mounted Police headquarters announced Assistant Commissioner C. H. King, director of criminal investigation, and Superintendent A. M. Kemp are being assigned to special duties in connection with details of the summer visit of the King and Queen.

Superintendent R. B. Tait, officer commanding the R.C.M.P. at Montreal, is being transferred here to succeed King as director of criminal investigation. Superintendent H. A. R. Gagnon will succeed Tait in Montreal.

Assistant Commissioner C. D. LaNauze, officer commanding "A" division here, will take over command of "F" division at Regina. Superintendent J. M. Pappert will take over command of "A" division here.

Appointed To U.S. Supreme Court
Washington.—Felix Frankfurter of Massachusetts, professor of the Harvard law school, was named by President Roosevelt to be an associate justice of the United States supreme court. Frankfurter was named to the vacancy created by the death last July of Benjamin Cardozo of New York.

Work For C.P.R. Employees

Winnipeg.—Canadian Pacific Railway officials announced 150 men would return to work in the Western shops here. It is expected the men will be given five months' employment reconditioning cars and coaches.

Canadian Envoy To France

Colonel G. P. Vanier Will Succeed Hon. Philippe Roy

Ottawa.—Lt.-Col. G. P. Vanier, counsellor and secretary of the Canadian high commissioner's office in London, has been appointed minister to France, and Jean Desy, counsellor to the Canadian legation in Paris, has been named Belgium and the Netherlands.

Prime Minister Mackenzie King announced the appointments following receipt of formal approval from the King. In selecting men from the existing diplomatic service to fill these high positions the government is adopting a promotion policy urged in the House of Commons last session by Hon. R. B. Bennett, then leader of the opposition, approved by Mr. Mackenzie King and in general practice among other countries.

Col. Vanier succeeds Hon. Philippe Roy, whose resignation as minister to France was effective Dec. 31. Mr. Desy will be the first minister to Belgium and the Netherlands. He will have jurisdiction over the new legations being established at Brussels and The Hague.

More Vigorous Policy

Says Britain Cannot Rely On Measures Of Passive Defence

London.—Great Britain cannot afford to rely on measures of passive defence but must be prepared to resort with maximum energy to any aggression, Winston Churchill wrote in the New Statesman (Independent).

To implement a more vigorous stand, he recommended instead of compulsory military duty a large increase in territorial troop strength, military service being determined by drawing lots in democratic fashion. Any possibility of hiring, or otherwise obtaining, substitutes should be barred.

The veteran Conservative member of parliament outlined a plan against war-profiteering whereby no business would be allowed to be richer at the end of a conflict than at the beginning except enterprises already beginning to expand at the outset of hostilities.

Short Fiction Story

Has Been Chosen By Press Women For Annual Contest

Toronto.—A short fiction story has been chosen by the Canadian Women's Press Club as the writing classification for its third annual members' memorial award, open to women in Canada. It has been announced. The award was established to encourage talent among women writers and to improve writing standards. This year an award of \$25 and a gold medal are offered for outstanding work by a Canadian woman writer published within 12 months previous to March 15, 1939. Entries, in triplicate, must be sent to the chairman of the memorial award board, Miriam Green Ellis, 404 Kensington building, Winnipeg, with a covering letter bearing the writer's signature. The competition closes March 15.

NORWEGIAN SKATING CHAMPIONS IN ENGLAND

Turid Bjørnstad, left, and Gerd Bjørnstad, right, sisters, and holders of the Norwegian Junior and Senior Skating Championships, are seen above at the Empire Pool Wembley, London, watching competitors in the Figure Skating Championships of Great Britain. Note the novel deerskin boots which the stars are wearing.

MAY RESIGN

Rigot Hon. Sir Thomas Inskip, British Minister for Co-Ordination of National Defense, who may resign from the Chamberlain Government as a result of severe criticism of his department by junior members of the British Government.

New Jap Cabinet

Dictator Premier Takes Over Reins Of Government

Tokyo.—Baron Kichiro Hirumata, Fascist-inclined president of the privy council and premier-designate, succeeding the comparative Liberal, Prince Fumimaro Konoye, completed his cabinet with three new ministers.

Lahi Watarai, minister of finance; Chuji Machida, minister of agriculture; and Yonozo Maeda, minister of railways, were the only new members of the government in the list prepared by the 73-year-old Japanese nationalist whose powerful, behind-the-scenes backers thrust aside the retiring premier for a more authoritarian form of government.

Machida, leader of the Minseitō party, one of the major political parties of Japan, previously has served in numerous cabinets since 1926 as minister of agriculture and commerce and as acting minister of finance.

Dairymen To Meet

Winnipeg.—Dairymen of Manitoba, Alberta, Saskatchewan, Ontario and Quebec will meet here Jan. 24-26 at the 54th annual convention of the Manitoba Dairy Association and Dairy Manufacturers' Association of Manitoba.

Find Miners' Bodies

Kirkland Lake, Ont.—The crushed and broken bodies of John Hopkin and Vito Valasevovic were removed from their rock tomb a half-mile underground in the Lake Shore mine by rescue crews which had worked unceasingly for eight days.

Storm Drives Ships Ashore

Istanbul.—Storms sweeping over the Black Sea drove 13 large cargo ships ashore and smashed hundreds of smaller craft. Many seamen were missing in addition to 22 drowned. A score died when the steamship Millet sank.

Says Canada Would Be Open To Attack In Event Of War

Ottawa.—Canada is the "logical" place of first attack by a nation making war on the British empire, Major P. A. Todd of Ottawa, officer commanding the 51st field battery of the Royal Canadian Artillery, said in a service club address.

If any European country tried to force its will on England, the first thing it would do would be to cut off her supplies and Canada, as a main source of supply, would be a logical point of attack, declared Major Todd who said he was speaking as a private individual and not as a military representative.

"We will have something to think about to preserve our own shirts," he said. Canada had a "millions of sorts" and since "time immemorial" it has been based on the idea of serving abroad.

Yet if war came, Canada must have the ability of defending her own shores. It was his "firm conviction" an expeditionary force never would again leave Canadian shores as every available man would be needed for home defence.

"We have spent \$900,000,000 on relief since 1933 and we have nothing to show for it. We should see that members of parliament learn our views on defence. Members reflect public opinion and you can't expect a member who represents a small western community, which knows nothing of world affairs to vote for large defence expenditures."

If attacked, Canada could be "put out of business" in three hours, which would not give the country time to seek assistance from United States or England, he said. Nowadays war was not declared and there was nothing to prevent an enemy nation from sending a number of ships on a "goodwill" visit to Canadian waters, so that they would be "within our own borders" when that nation decided to strike.

An aeroplane carrier had 50 planes and "these planes could attack the centres of Canadian industry in three hours and would not give us time to get assistance from the United States or England," he said.

Wheat For India

Sailing With First Cargo Of Canadian Wheat To That Country

Vancouver.—The freighter Hoegh Carrier is preparing to sail for Bombay, carrying the first cargo of Canadian wheat ever shipped to India. Officials of the Canadian Grain Export Company said they had orders for approximately 8,000 long tons of Canadian wheat for export to India this month.

Arahs Lose Heavily

Jerusalem.—A fight between British troops supported by Royal Air Force planes and an insurgent Arab band near Samaria cost the Arabs heavy casualties, but exact figures were not available. The soldiers captured a number of prisoners and a large supply of guns and munitions.

Study Electoral Changes

Edmonton.—Alternative plans for maintenance of the Alberta legislature membership at 63 and its reduction to 56 will be before the redistribution committee of the Alberta legislature when it meets to resume study of electoral changes.

Gift For The King

Hudson's Bay Company Solves A Knotty Problem

London.—A knotty problem for the Hudson's Bay Company, whose charter, granted in 1670, calls for them to produce a couple of live elk and a pair of black beavers as tribute to a visiting monarch, has been solved. The king has agreed to accept instead two mounted elk heads and two beaver skins. The presentation will be made by Ashley Cooper, governor of the company, probably in Winnipeg May 24.

Italians Indignant

Rome.—Fascist indignation was fired by despatches in Rome newspapers describing the burning of an Italian flag by a crowd in anti-Italian "riots" at Tunis, capital of France's protectorate of Tunisia.

Visit Nickel Belt

Sudbury.—Thirty-one Afrikaners from the University of Witwatersrand in Johannesburg, South Africa, near the mighty Rand goldfields, will visit the Dominion's nickel belt here. They will later leave for the west.

Will Limit Number Of Addresses During Royal Tour Of Canada

Ottawa.—During their tour of Canada next May and June the King and Queen are not to be expected to listen to addresses of welcome except in Ottawa or provincial capitals, Prime Minister Mackenzie King announced.

In a statement containing further details of the royal visit the prime minister said that in no case were Their Majesties to be expected to reply orally to any addresses.

Except for the day of Their Majesties' arrival in Quebec, May 15, there must be no more than one official meal-time gathering, a luncheon or dinner, in any one day. At Quebec there will be a luncheon given by the federal government and a dinner by the provincial government.

Their Majesties are not to be asked to accept degrees from any universities nor to accept invitations from private individuals, private corporations or individuals. No private hospitality will be accepted at any point in the tour.

No visits will be made to any educational or charitable institutions nor to any industrial plants. Several speeches are expected to be delivered by the King and Queen while they are in Canada and all will be broadcast, the prime minister said, but details are not yet ready for announcement.

It was desirable all local arrangements be in the hands of the secretary of the inter-departmental committee by March 1, the prime minister said, since all details must be submitted for approval of Their Majesties.

With respect to restrictions on official entertainment it will be necessary for the lieutenant-governor and his advisers in each provincial capital to decide whether the official luncheon or dinner would be given by either the lieutenant-governor or

provincial government or both combined.

Municipalities desiring to present addresses of welcome will be permitted to pass them to a designated member of Their Majesties' party and to have them published in the newspapers, but with the possible exception of capital cities, none will be listened to by the King and Queen.

Special provisions are requested by the prime minister to afford children and war veterans opportunities to see the King and Queen.

In arranging processions through provincial capitals calls will be made at legislative buildings and city halls, the stops to be made in order of convenience according to the route of the procession.

Responsibility for protection of Their Majesties will rest upon the commissioner and officers of the Royal Canadian Mounted Police, who will seek co-operation of provincial and municipal police.

The visit of Their Majesties being that of the king and queen to the people of Canada, the latter will, of necessity, be represented on public occasions by their duly elected or officially appointed representatives.

The responsibility for decorating federal buildings, wherever located throughout the Dominion, will be assumed by the federal authorities. The federal government will also assume responsibility for state functions at the capital.

Provincial and municipal authorities will be expected to make appropriate provision for the decoration of other public buildings and of streets, as well as accommodation for the viewing of processions and for public receptions in the localities to be visited.

Special attention is being given by the committee in charge to the procedure to be followed at stations through which the royal train will pass or at which short stops are contemplated.
